Please amend the paragraph beginning on page 6, line 13 as follows:

--Here, each terminal device (television set 13, cellular phone 31 and personal computer 47) has a slot to insert a memory card 11_x (11_1, 11_2 11_3, . . .) being storage means. When operating these terminal devices, the user inserts the memory card 11_x (11_1, 11_2 11_3, . . .) that is individually owned by the user in the above operating terminal. As shown in Fig. 2, the memory card 11_x (11_1, 11_2 11_3, . . .) is composed of a connector 11B to connect to the slot of each terminal device and a memory 11A that is connected to the above connector 11B via a bus BUS.--

IN THE CLAIMS

Please amend claims 1-4 and 6-11 by rewriting same to read as follows.

--1. (Twice Amended) A network system comprising:

a terminal device; and

a network server connected to said terminal device via prescribed communication means, wherein a user of the network system and said terminal device to be used by the user are recorded in said network server, and said network server converts information to be transmitted to said terminal device used by the user into conformed information conformed to said terminal device used by the user, and transmits the conformed information to said terminal device.
